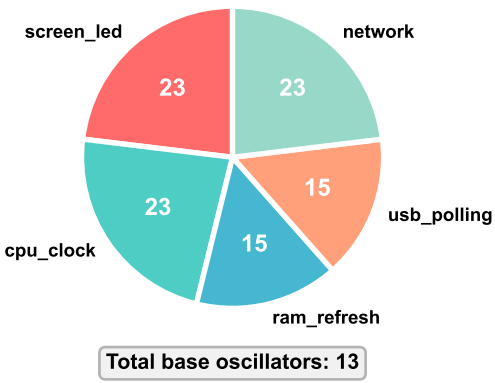
Hardware Oscillator Network: Real Computer Components

A. Hardware Oscillator Sources



B. Network Statistics

```
Network Topology
═══════════════════════════════════

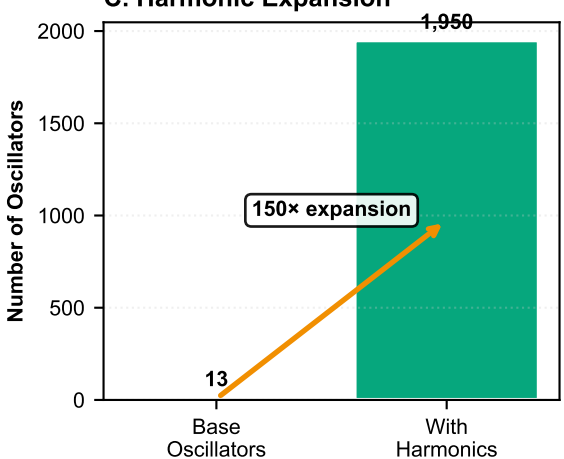
Base Oscillators:     13
With Harmonics:       1,950

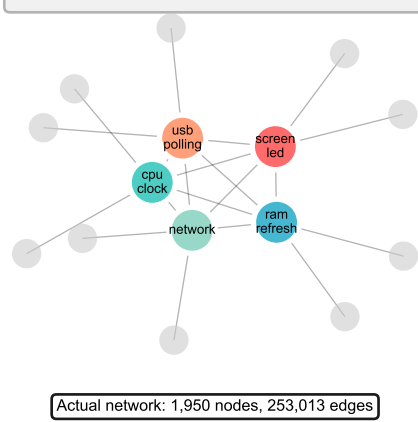
Graph Structure:
──────────────────────────────────
Nodes:                1,950
Edges:                253,013
Average Degree:       259.50
Density:              0.1331

Enhancement:
──────────────────────────────────
Redundancy Factor:    259.50
Graph Enhancement:    5.94e+04×

Measurement:
──────────────────────────────────
Zero Time:            True
Data Source:          Real computer oscillators (not simulated)
```

C. Harmonic Expansion





D. Network Topology (Simplified)
