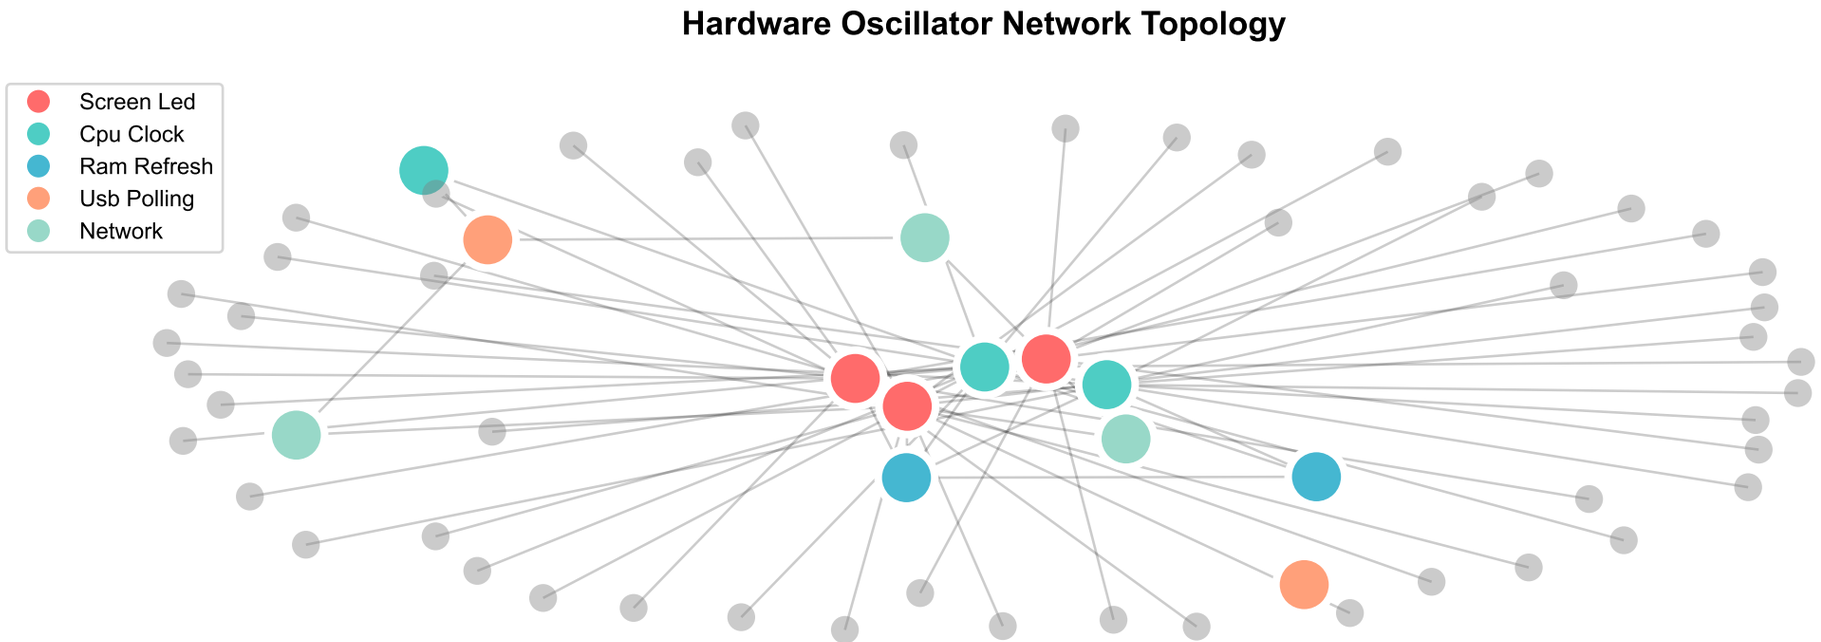
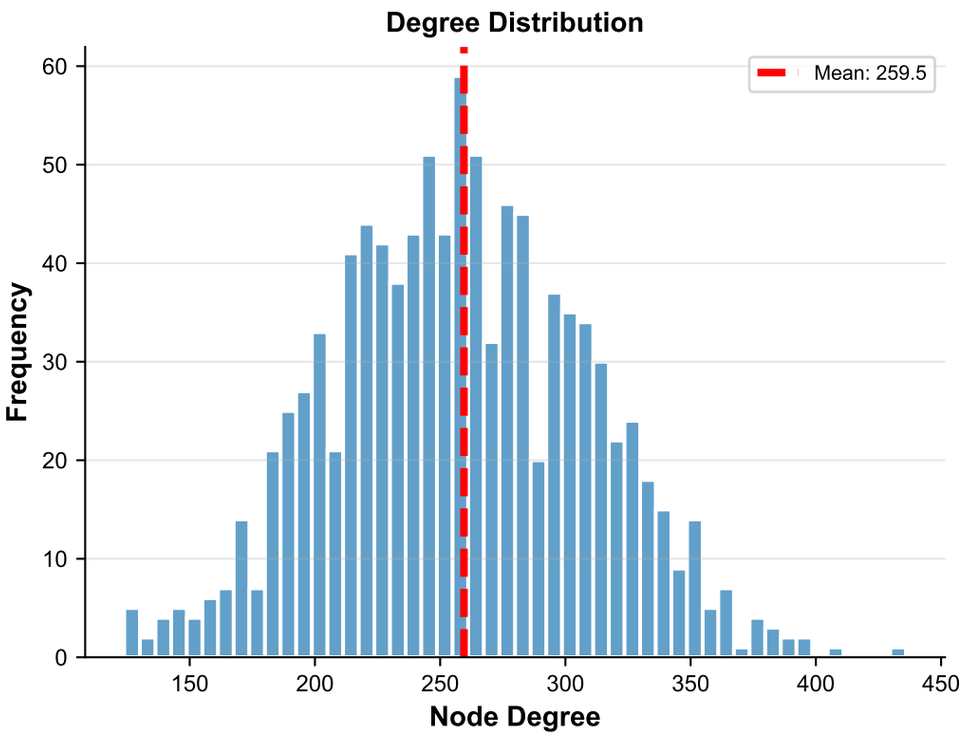
Network Architecture: Real Hardware Oscillators





```
Network Metrics
═══════════════

Nodes:              1,950
Edges:              253,013
Average Degree:     259.50
Density:            0.1331

Enhancement Factors
═══════════════════

Redundancy:         259.50×
Graph Enhancement:  5.94e+04×

Connectivity
════════════

Highly connected network enables:
  • Parallel state access
  • Redundant pathways
  • Error resilience
  • Zero-time measurement

Status: ✓ FULLY OPERATIONAL
```
