(D) Pump Rate Distribution

MAXWELL DEMON SUMMARY

Physical Parameters:

- Temperature: 37.0°C (310.15 K)
- ATP energy: 30.5 kJ/mol
- Trials: 100

Ion Gradients:

- Na⁺: 14.5x (out/in)
- K⁺: 0.03571428571428571x (out/in)
- Ca²⁺: 18000.0x (out/in)
- Cl⁻: 11.0x (out/in)

Demon Function:

- Sorts ions by information
- Extracts work from gradients
- ATP-driven operation
- Maintains non-equilibrium

H⁺ Framework Connection:

- Biological: Ion sorting
- H⁺ system: Frequency sorting
- Both: Information processing
- Both: Energy extraction

Validation:

- Maxwell demon: ✓
- Information → Energy: ✓
- H⁺ analogy: ✓
